New Digital Safety Reports

There is no doubt that we live in a world where data and cybersecurity are very much in focus. To provide security to our customers, no matter what happens, we have further developed our digital security reports.

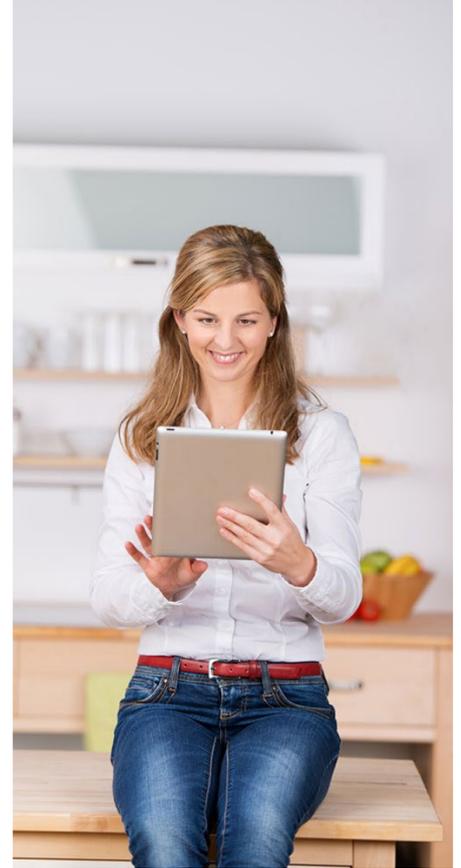

Picasso's digital reports are a great feature for our customers, where every day (or period of choice) the hotel automatically receives selected reports by email.

We have now created a new feature that automatically sets up the reports below and sends them to the hotel's main email on a daily basis.

From the moment your Picasso Digital is updated, this new feature will be installed automatically!

However, it can be turned off if you do not want it, or you can change the properties of the reports in the report module. The report by default will run 10 days ahead. You can, for example, change it to run over a longer period, to be sent at other intervals etc. Call our support if you are not sure how.

- Newly designed security report with arrivals, in-house and departure lists on the same report
- Occupancy report of rooms - 1 year forward
- New event report with customer name, wares and halls
- New report on the number of room and hall vacancies during a set period of time.

Create an email for safety reports only

These reports are sent by default on a daily basis to your main email, but we recommend that you create a new email address - for example a free gmail to which the reports can be sent. Then you always have them on hand without them filling up your main email account.

At the same time, please pay attention to deleting old mails in this mailbox from time to time in accordance with your GDPR standards.

Picasso support is back full time and in the usual ways of contact

Denmark	Ph. +45 36 19 21 30	(System Errors Outside Working Hrs):	Ph. +45 29 25 01 01)	picassosupport@techotel.dk
