

Picasso Newsletter July. 2016

A SUMMER FILLED WITH GUESTS

Picasso's collaboration with other systems helps get you a packed hotel!

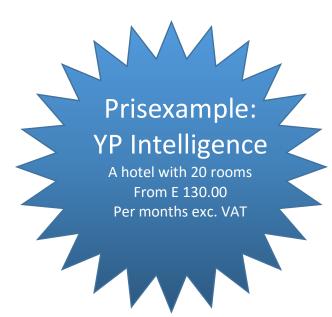

Picasso is constantly being developed with the aim to facilitate the path towards full occupancy at the right prices.

Besides Picasso's many own functions play Picasso also with a wide range of applications that can help increase your reach and save time on administration.

YP Intelligence

YP Intelligence is also known as Yield Planet is now used by 115 hotels in integration with Picasso. Picasso receive reservations from YP Intelligence, and you can set prices, availability and restrictions directly from Picasso in YP Intelligence Channel Manager and on to Booking.com, Hotels.com, Trivago and 600 other channels.

Read more on Yield Planet or Techotels website or write to Rasmus on ra@via-system.dk **Improve**

Improve is also known as Loopon, is a customer feedback management system that can help you gain insight into your customers' wants and needs, and thus the possibility of optimizing the company.

YP Intelligence
Channel Manager

Revinate

Revinate is the world's most widely used marketing tool that helps target and optimize your contact with the customer.

Read more at Revinate or write to Klaus on ka@techotel.dk

and many other features that help you in your everyday working life

The First User meeting Is Held

The first of our two user meetings in 2016 took place in Aarhus on June 9 on Marselis Hotel.

Participants were given a review of the functions and asked many good questions and suggestions as TECHOTEL has brought home to the development department.

We would like to thank the participants for a pleasant and informative day.

User Meeting no. 2 takes place in Copenhagen d. 30 sept. 2016 pm. 9 to 15.30 There will be served breakfast, lunch and coffee and the price is 350, -DKK / person. - Denmark's cheapest Picasso Education.

Registration and more information: re@techotel.dk

Split bills in the box

Now you can split the bill up in the box for more customers who want to split the bill, share some of the bill or pay separately.

When you press the "split AMOUNT" on either Sales or Tables in the cashier module, so appears the box where you can enter how many bills folioen be split up

Tips & Tricks:

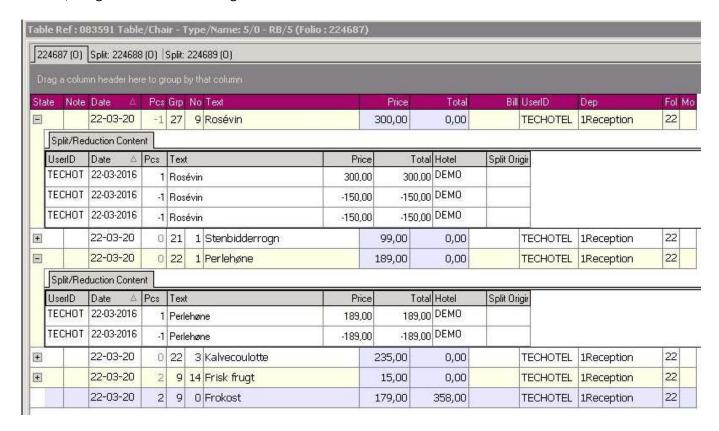

When you check out, write in the lower box Total no. Bills the total number you want to share the total up.

In the top field No. Bills now enter the number of bills you initially want to process payment. A similar number of folios will be created.

Select the transactions you want to split and click the bill split. As shown below, formed only one tab to the total order and subsequent tabs for each division . If you click on the plus corresponding to each product you can see additional information about the split.

Below you see the rose wine is ordered joint and paid 50 % of each. In return, the guest who have eaten guinea fowl even for this .
